### Pickleball Open Play

---

Pickleball: Fastest Growing Sport – invented in the mid 1960s is a paddle sport (similar to a racquet sport) that combines elements of badminton, tennis, and table tennis. Two or four players use solid paddles made of wood or composite materials to hit a perforated polymer ball, similar to a Wiffle Ball, over a net. The sport shares features of other racquet sports, the dimensions and layout of a badminton court, and a net and rules somewhat similar to tennis, with several modifications.

Easy to play, very social and less stressful on muscles, tendons and joints!

Pickleball will boost the cardiovascular system which helps prevent many of the unwanted problems of older age like hypertension, stroke and heart attack. Pickleball gives you a good aerobic workout without as much stress and strain on joints and muscles, as mentioned above.

3. The 'Classes' screen will show the available pickleball times, then click on the class (blue) or 'Learn More' button.
